

Important paragraphs

1. Online shopping

Many people prefer online shopping over the traditional way of shopping. Shopping online is great! Firstly, it saves me time. I don't want to spend lots of time travelling to the shops. You can shop and buy in just a few minutes. I can stay at home and buy the things I want in a few minutes. Secondly, I have more choice online. Also, if more people shop online, there will be fewer cars on the road and less pollution! I will do all my shopping online when I am older.

2. Healthy food

A healthy diet means eating enough healthy things like fish and vegetables, and not eating a lot of salt, sugar and fast food. Healthy food is very important for our bodies. It gives us energy and helps us to be strong. We should eat it before and after doing a lot of sport. But we should only eat a little sugar because it is bad for our teeth. Protein is something that helps our body to recover after exercise. Meat, fish and dairy products, like milk and cheese, contain a lot of protein. It isn't a good idea to eat fast food. We shouldn't eat too many cakes.

3. Clothes in Ancient Egypt

In Ancient Egypt, men and women wore similar clothes. They both wore loose, white, linen clothes with a belt. Most of the time, Ancient Egyptians did not wear shoes but people sometimes wore expensive leather sandals. Children did not usually wear many clothes until they were about six years old. Then they started to wear the same clothes as their parents. Although Ancient Egyptians' clothes were simple, they loved to wear heavy, metal jewellery. Like some people today, they liked to wear beautiful gold necklaces and other jewellery.

4. Environmental problems

There are many environmental problems that we face every year and negatively affect us, such as global warming, storms, earthquakes, volcanoes floods, fires and air pollution. Old cars and factories cause a lot of air pollution and global warming, so electric cars must be used to reduce air pollution. Companies are going to use drones a lot instead of lorries to make deliveries. This is going to help the environment because drones don't make much noise and they don't cause as much air pollution as lorries. We can use drones to help save wildlife after floods or fires. We should do our best to stop environmental problems.

5. Animal communication

Animals can't speak in the way people can, but some animals like birds can copy sounds. But animals do communicate, both to us and to each other. One way animals communicate is by using body languages. For example, horses touch noses to say hello to another horse they like and bees dance when they find a good flower. They understand when someone is angry and understand some words like 'dinner' and 'come here' for example. If an animal is scared, you should move slowly and use a soft voice.

6. New Technology

New technology means that forms of communication are changing all the time. For example, think about how phones have developed over the last 20 years. In the past, people used to type messages using special letters on their phones. Then, people started to touch the screens on their phones to type their messages. Now, phones are able to understand people's voices and many people are speaking to their phones to send messages. Some scientists think that phones are going to know what people think in the future. Perhaps our phones will read our facial expressions before they send a message!
