If someone asked you to **name** a famous trip to the moon, you would probably say the Apollo 11 trip in 1969. But did you know that when Apollo 17 went there in 1972, there had been five other trips to the moon? There have been no trips since 1972.

We all know Neil Armstrong was the first person to walk on the moon, but who was the last person? That was Eugene Cernan. He was on a 12-day trip on Apollo 17 which brought the largest moon rock to Earth! When Neil Armstrong walked on the moon, he said it had been one small step for a man, but a very big step for all of us. When Eugene Cernan left the moon, he said, "*We shall return, with peace and hope.*"

So why were trips to the moon stopped? It was too expensive, but today, as technology gets better, there are plans to send spacecraft to the moon again.

3 Read the following, then answer the questions: (6 m / 1 m each)

Should we work all the time without having rest or entertainment? The answer is that we cannot go on working without stopping from time to time to have some rest. If we did not do that, we could make mistakes and the quality of our work might get worse. An overworked person may end up by losing the ability to think clearly and having no energy to go on working.

Sleeping is one of the ways that renews everyone's energy. Sports and games are also important for brain workers who stay in closed offices and do not have a good chance to do exercises. They can make full use of weekends doing activities like swimming and walking in the open air.

We should try to forget about the worries of work and life for some time. Then, we can enjoy ourselves and return the next day to work with our energy fully renewed. Such change has a great effect on our health and performance.

A. Choose the correct answer from a, b, c or d:

Dear Mona,

How are things? I hope you are well. Forgive me for the delay of my reply to you. I had a problem with my internet connection, so I just got your message with the picture of you riding your bike. From the smile on your face, I can tell how much fun you are having. I still remember when you could hardly ride a tricycle. You have come a long way!

Now, here is some advice. I'm sure you are a good rider. But, you will fall of that bike now and then. So, please get yourself a helmet. Wear it every time you ride. A helmet will help protect you from a head injury. Wearing a helmet when you ride a bike is as important as wearing your seat belt when you drive a car. When you come to visit me this summer, bring your bike and your helmet. We will take some great rides together!

That's all for now. Waiting for your reply.

yours

We can't live without Protein. Protein is important for everyone, not just athletes and body builders. Protein is essential to building bones, and body tissues, such as muscles, but protein does much more than that. Protein participates in every process of a cell.

Protein is found in both meat and beans, each offering benefits to our health. Meat, such as beef, chicken, and fish, is a rich source of complete proteins. Meat provides us with iron, zinc, and vitamin B12, which are important for energy and our health, too. On the other hand, beans, including black beans, lentils, and peas, are valuable plant-based sources of protein. Beans are also high in fiber and supporting heart health.

Both meat and beans are important sources of protein in a balanced diet. The choice between them depends on individual preferences, needs, and health goals. Having a variety of protein sources, including both meat and beans, supports our health.

Recycling is very important because it helps us to take care of our planet! When we recycle, we don't throw away things like paper, plastic bottles, or cans. Instead, we collect them and send them to specific places where they can be made into new things. This is really useful because it means we can use things again and again, which saves energy and helps keep the Earth clean and healthy.

Recycling saves energy that's because recycling materials uses less energy than making new products. It reduces the amount of waste that is sent to landfill sites. When we leave waste on landfill sites for a long time, it produces different kinds of harmful gases. Also, carbon dioxide increases when we burn fossil fuels which are gathered in landfill sites causing climate change.

By recycling paper and wood we cut down fewer trees and forests where many different kinds of wild animals live which means that we can save **them** by reducing the damage done to their natural habitats. To conclude, recycling is very important for both people and the environment.

A. Choose the correct answer from a, b, c or d:

There are lots of ways we can protect our environment and build a greener world. We need to use cleaner, greener energy.
 If factories had solar panels on their buildings, they would save money and energy. We need more people to work together to get renewable energy for their communities. If more communities had wind turbines, they would have cheaper, cleaner energy. We can also help the environment by planting more trees.
 What about plastic? Millions of plastic bottles are used every day. When these bottles are recycled, the plastic is used to make clothes, toys, carpets and furniture. Glass and metal can be recycled, too. We don't **recycle** enough and that's why there's still so much rubbish in landfill sites.

A. Choose the correct answer from a, b, c or d:

1. can help people have cheaper, cleaner energy.
 (a) Wind turbines (b) Factories (c) Communities (d) Buildings

Many different wild animals throughout the world are in danger. An endangered **species** is a type of animals or plants that will probably become extinct. There are thousands of animals and plants that endangered worldwide.

Most countries have laws to protect endangered animals. The reasons for this are many, but we must blame pollution, the destruction of the animals' natural environment and man's greed. Waste from factories causes great loss of river life. Some animals are endangered because their habitats are being destroyed because of the increase in population, which has meant more buildings, more vehicles, and more pollution. People are building cities and cutting down trees where animals live. Other animals are endangered because people are hunting and killing them.

Some of the endangered animals in the world include the black rhino found in Africa, the orangutan in the country of Malaysia and the blue whale. Finally, other endangered species examples include the Bengal tiger, giant panda, mountain gorilla, sea lions and others.
