(5 marks)

In recent years the number of environmental problems has increased greatly. One of the most dangerous problems for our planet is global warming. Global warming means that most climates all over the world are changing and getting warmer. It happens because we burn too much petrol resources such as oil and coal. Climate change causes too many problems. It

causes floods, severe droughts in different areas of the world. There are different kinds of environmental pollution; air pollution, water pollution, and land pollution. We must do our best to stop pollution. That's why, we should start recycling things made of glass, paper, plastic and aluminium. We should stop smoking and plant as many trees as we can. Planting more trees can give us more oxygen. We need to drive less and use green transport to reduce fuel burning.

A. Answer the following questions:

1. Why does global warming happen?

.....
