### 2 Read and complete the text with the words from the box:

**nails - swallow - digestive - stomach - attracts**

Are magnets useful in farming? We know that cows eat grass, but sometimes they can eat bits of metal that are on the ground in fields, such as ① ..... or bits of wire. Farmers give cows a magnet to ② ..... The magnet stays inside the cow's stomach and ③ ..... all the metal. This stops the metal from damaging the cow's ④ ..... system.

### 3 Read and complete the text with the words from the box:

**direction - movement - pulling - speed - contact**

Friction happens when one object touches another object as it moves. Pushing, ① ..... and friction are ② ..... forces. The two objects have to touch each other for the ③ ..... to happen. The contact can stop, start, or change the ④ ..... or direction of the movement.

**4 Read the following text and answer the questions below:**

Magnets are useful in factories. Big magnets can sort out materials for recycling, or even moving old cars. Magnets are useful for computers. Magnets are used to store information in computers. The magnetic areas used for this are narrower than human hair! Magnets are useful for transportation. Some of the most modern train systems use magnets. The train is lifted off the ground, so it has less friction. The magnet keeps it in the right place. The train can travel very quickly!

**A Choose the correct answer:**

1. Some of the most modern (**boat - train - bus**) systems use magnets.
2. Magnets are useful for (**transportation - computers - factories**). It helps trains travel quickly.

**B Answer these questions:**

# Test (4) on Unit (10)

## 1 Listen and write the missing sounds:

dan \_ er

\_ iraffe

banda \_ a

villa \_ e

## 2 Read and complete the text with the words from the box:

**Friction - Measure - distance - experiment - ramp**

We can do an experiment to see how friction works. Roll a toy car down a ① \_\_\_\_\_, . ② \_\_\_\_\_, how far it travels. We can put glue and sand on it. If we roll the car down the ramp again, will the ③ \_\_\_\_\_, change? ④ \_\_\_\_\_, works in the opposite direction to the way the object is moving, so it makes things move more slowly.

## 3 Read the following text and answer the questions:

Friction is a contact force between two surfaces. We use it every day, from when we put our foot on the ground to run, to when we use an eraser to rub out pencil marks. Friction works in the opposite direction to the way the object is moving, so it makes things move more slowly.

### A Choose the correct answer:

1. Friction is a force between two (poles - directions - surfaces).
2. Friction makes things move more (quickly - slowly - fast).

**B Answer these questions:**

3. When do we use friction?
