**B. Reading Comprehension (10 Marks)**

**2. Read and complete the text with words from the following list: (4.M)**

(destroy- cleans- plants - Coastal- clean- improve)

The world has different habitats that support many species.(1).....  
areas are rich in life. Grasslands are important for animals to live.  
Rainforests have a lot of different (2) ..... and animals. Wetlands help  
(3)..... water and protect nature. In polar regions, remote habitats are  
facing problems from climate change, which can (4)..... wildlife.

**3. Read the following text, then answer the questions: (6 Marks)**

Deforestation and pollution are serious environmental issues that affect the earth. Trees play an important role as they absorb carbon dioxide and help to slow down climate change. When forests are cut down, this leads to increased air pollution and affects the landscape negatively. Traditional environments, such as wetlands and forests, are essential for maintaining biodiversity and supporting ecosystems.

Furthermore, droughts and desertification threaten agriculture because they make it harder to grow crops. This can lead to food shortages if we do not solve the problem. One way to overcome these issues is to collect and recycle waste instead of sending it to landfill sites, which really harm the environment.

Moreover, we can use renewable energy sources to reduce the use of fossil fuels. If we understand the effects of gravity on water cycles, it can also help us develop solutions to avoid future problems. We should preserve our natural landscapes for the future generations. It's our great duty.

**A) Choose the correct answer from a, b, c or d:**

1- The text mainly tell us about..... .

- a) school life
- b) an important trip
- c) environmental problems
- d) social events.

2- Droughts and desertification can lead to food .....

- a) length
- b) shortage
- c) depth
- d) height

**B) Answer the following questions:**

3- What does the underlined pronoun “it” in the second paragraph refer to?

.....  
.....
