-The Nile is the longest river in the world. It's like travelling to the center of the earth. It's 6,670 kilometers long. The Nile has two branches in Egypt. The Nile is very important to the Egyptians. It provides Egypt with water, food, transportations and good soil for growing food.

I love my bedroom. I share it with my sister. On the right, there is my bed with a desk next to it. On the left, there is my sister's bed. In the middle of the room, there is an armchair with two cushions and a big closet. On the wall, there are lots of posters of animals.

The Ancient Egyptians loved animals and kept many as pets. They particularly adored cats, and there was a cat almost in every house. The Ancient Egyptians believed that cats looked after them and kept them safe. They were also good pets because they cleaned themselves and kept the houses free of pests like rats and snakes. Ancient Egyptians also loved birds like falcons and the ibis.
