Hello Tamer,

How are you doing, my good friend? I hope everything is fine with you. Let me tell you about my trip, to Nabq National Park. Nabq is a very big national park in South Sinai. Along the coast here, there are 4.8 kilometers of mangrove forest, which is the largest in the Red Sea. We went there to learn why mangrove forests are so important for the marine ecosystem. When we arrived at the beach, we saw trees growing out of the sea! Most trees can't grow in salt water, but mangrove trees can. They have amazing roots, which grow high out of the water. Write back soon.

Bye

Subject: An exciting trip to Luxor and Aswan

Dear Jana,

How are you? Last month my family and I decided to go to Luxor and Aswan. We went there by train. It was a nice train journey. We saw lots of cities, towns, and villages during our journey. We stayed in a hotel there. First, we saw the High Dam in Aswan. Then we visited Karnak Temple. We also visited the Valley of the Kings. The weather was sunny. We were very happy. We decided to go there again. See you soon.

Yours,

Nada

October Mini-Test (A)

1 Read and complete the text with the words from the list:

- 1 living things 2 non-living 3 species 4 survive

2 Put the words in the correct order to make sentences:

- 1.They live close to a mountain.
2. How often does your heart beat?

17 Write a paragraph of (50) words using the following guiding elements:

"Rain"

Rain is very important. Living things can't live without water. Rain helps humans and animals to drink. And it helps plants, trees, and grass to grow. If there isn't rain, plants and grass won't grow. Animals that eat plants will be hungry. They might die. So bigger animals also won't find small animals to eat. So water is life. Without water, there is no life.
