**Read the following passage, then answer the questions:**

People find it challenging to solve problems quickly. They want to get fast results, or make money, or make life easier. Often, they don't look into the future. They don't think about the long-term **consequences** of their actions. The story of DDT is a good example. It is a chemical which was developed to kill insects. It was invented in 1940, and very soon it was being used effectively by farmers all over the world.

The results, at first, were successful. The chemical killed the harmful insects which ate the food plants. More crops were produced, and both farmers and industry made a lot of money, however, the chemical had effects which scientists hadn't predicted. DDT not only killed the harmful insects but it also killed useful insects. A few insects were strong. They survived and multiplied. In a few years, there were large numbers of these super insects which DDT couldn't kill. Clearly, DDT was making the problem worse. It was worthless to be used anymore.

Another problem was that the chemical did not disappear. It stayed in the ground and found its way into rivers, lakes and oceans. So, animals began to suffer from different new diseases. Humans also began to have problems, especially, in areas where DDT was widely used. Many governments stopped the use of DDT twenty years ago, but its effects are still with them.

**Choose the correct answer from a, b, c or d:**

- 17 Which of the following is probably true about DDT?
- a) It kills only harmful insects.
  - b) It kills only useful insects.
  - c) It kills both harmful insects and super insects.
  - d) It kills both harmful insects and useful insects.
- 18 What does the word "consequences" refer to, according to the passage?
- a) Exciting things that could happen.
  - b) Boring things that could happen.
  - c) Useful things that could happen.
  - d) Bad things that could happen.
- 19 Where does DDT end up eventually?
- a) In the ground.
  - b) In humans and animals.
  - c) Into rivers, lakes and oceans.
  - d) Into the crops that farmers grow.
- 20 Much damage to the environment happens as people .....
- a) want to get fast results
  - b) don't think about the future
  - c) want to make life easier
  - d) want to make money
- 21 DDT was very ..... at first and more crops were produced.

**Read the following passage, then answer the questions:**

In Britain, most schools are financed by the state. Children attend those schools for free. There are many local variations in the details of the school system. The general pattern of schooling in Britain is well-organised. All children must start school at the age of five. Many have previously attended playschools or nursery schools, but these are not compulsory.

Primary education, whether state or private, seeks to develop all aspects of the child: physical and emotional, as well as intellectual and cultural aspects. Most schools concentrate on the child's development of his or her potential, rather than on training for a particular exam.

At the age of 11, children move to different schools. These are called secondary schools, and children of all abilities go to the same school, the pupils have a set timetable of subjects, including arts subjects, such as history, English and a foreign language, as well as science subjects and sports. At the end of this period, most pupils take one of two public examinations.

After these exams, i.e. at the age of 16 or so, most pupils leave. Pupils usually take a public school-leaving examination. Their results in these exams will largely determine whether they now start to work or they can continue with higher education at a university or college.

**Read the following passage, then answer the questions:**

Always choose your neighbour. I have some ideal neighbours. One of my favourites is a man and his wife. The man is a retired army officer and his wife is still working for the nearby university. They are very hospitable. It is particularly enjoyable to wake up on a Friday morning to the sounds of their music playing which are really quite artistic. However, I also love to hear them laughing when they make a mistake in their music playing. Besides music, carpentry is still the man's main interest, and most days he is outside in his workspace in the garden, making an artistic piece of furniture. My neighbours are ideal to live next door, too, because they can be very helpful if I need them. I respect them as they never interfere in my private life and I behave with them in the same way. We have helped each other with numerous emergencies such as fires and car accidents. We also co-operate with each other in little ways such as bringing the mail, when one of us is away. We sometimes meet when they invite me over for coffee, with some of their friends who are usually very interesting people: poets, painters, professors and other lively persons whom I enjoy meeting. Sometimes we go to the fireworks display. Apart from this, we simply live next door to each other peacefully, side by side.

**Read the following passage, then answer the questions:**

Mourad had got into a million hobbies and activities, but he never stuck with any of them long enough to get any good. He begged his mother for months for a guitar, but strumming the strings hurt his fingers and he didn't like holding the pick, so now the guitar lives under his bed.

After reading an ad, Mourad decided that he wanted a metal detector to find buried pirate treasure. So he didn't spend his money on ice-cream like his younger brother. By the time he had saved \$200, he purchased the Wonder-Sweeper metal detector, but he soon found out that no pirates had ever set sail in his neighborhood. Even though he found a key ring, fortyseven cents, and all the bottle caps he could throw.

Given Mourad's history with hobbies, Mourad's father was reluctant to buy him a magician's kit for his birthday. Mourad was insistent. But Mourad's father remembered his own youth long ago when he quit football and started karate practice before hardly getting his equipment dirty. So, Mourad was both surprised and pleased to have the magician's kit.

At this time, a commercial on the TV caught his attention. "Hey, kids! Have you ever wanted to go to space? Mourad walked away from the magic kit and stared at the TV screen. He now knew what his true purpose in life was.

**Read the following passage, then answer the questions:**

"Click!" That's the sound of a seat belt locking in place. Seat belts save lives and that's a fact. When you drive a car and it crashes; what's going to stop your body? Will it be the windshield or your seat belt?

Some people think that seat belts are uncomfortable, but at least it's better than sticking to the windshield. Wearing a seat belt is both cooler and more comfortable than the alternatives. If you are not wearing your seat belt, you can hop around the car and slide in and out of your seat easily. But, you are also more likely to die or suffer serious injuries. You also have to stay in your seat. But, you are much more likely to walk away unharmed from a car accident.

How about giving money away? When you don't wear your seat belt, you are begging to give your money away. That's because if you're riding in a car, and you don't have a seat belt on, the police can fine you.

Wearing a seat belt does not make you invincible. You can still get hurt or killed while wearing your seat belt. But wearing them has proven to be safer than driving without them. You are much less likely to be killed or seriously injured in a car wreck if you are wearing a seat belt. So why not take the safer way?
